

FUEL TEST

Request to witness sampling

To: **Fuel Supplier / Supplier's Representative**

Vessel : _____ Port of Registry : _____

IMO No : _____ Grade/Grades of Fuel Ordered : _____

Bunkering Port : _____ Bunkering Date : _____

Fuel Supplier : _____

This vessel uses the **TRIBOCARE** Fuel Test service for checking the quality of the fuels delivered to it. The ship's staff will be carefully drawing a representative sample during the course of this bunkering operation. The sample will be drawn as a continuous drip sample at the point of Custody Transfer.

The sample will then be split into four parts - bottled, labelled and sealed - and distributed as follows:

- One bottle will be forwarded to TRIBOCARE for analysis which will be reported back to the owner. Seal Number(s) _____
- The second bottle will be offered to yourselves - the fuel supplier. Seal Number(s) _____
- The third bottle will be retained onboard. Seal Number(s) _____
- The fourth bottle will be retained onboard as MARPOL Annex VI sample. If the supplier provides a MARPOL Annex VI sample taken at the receiving ship's manifold, using a continuous drip line sampler and throughout the entire bunkering process, the fourth bottle is not needed. _____

In view of the importance of taking a representative sample of the fuel being delivered, we hereby request a representative from yourselves, or a representative acting on your behalf, to witness sample-taking and the subsequent labelling and sealing of the sample bottles.
